Project Manager

Job Description

Advanced Development Services, Inc. is a developer, owner and operator of power generation and energy delivery assets, located in Los Angeles area of CA, is seeking an experienced Project Manager for its Woodland Hills, California office to provide technical guidance to business development efforts and support advanced development and construction for wind energy projects.

The individual will be responsible for supporting the technical needs of projects in development as well as managing projects from site acquisition and early development through construction to achieve commercial operation.

Responsibilities will include:

- Environmental and local authorities permitting
- Engineering oversight
- Project community relations
- Negotiating interconnection agreements and construction contracts to support successful completion of projects.

Skills and Education Required:

- Strong contract management, technical and communication skills are essential.
- A bachelor's degree in engineering is required and a business degree is desirable.
- The desired candidate will have a minimum of five years of power project experience with involvement in the execution phases of either wind or combined cycle projects.

The individual will be reporting to the Chief Operations Officer in the company's Woodland Hills headquarter office.

To become part of a growing and exciting venture, please forward your resume to resume@advanceddevelopmentsite.com. A salary history must be included and no phone calls please.
